Face recognition

What is face
recognition?

Face recognition

A blackboard with the handwritten text "a video" in orange. The text is written in a cursive, handwritten style. The letter 'a' is on the left, followed by a space, and then the word "video" is written in a single continuous stroke. The blackboard is a solid black rectangle.

Face verification vs. face recognition

→ Verification

- Input image, name/ID
- Output whether the input image is that of the claimed person

1:1

99.0%

99.9

→ Recognition

- Has a database of K persons
- Get an input image
- Output ID if the image is any of the K persons (or “not recognized”)

1:K

K=100 ←
